

NPS RESEARCH & SPONSORED PROGRAMS

RESEARCH & SPONSORED PROGRAMS

PROGRAM OVERVIEW

The Naval Postgraduate School (NPS) has robust sponsored research and education programs. Per U.S. code, Title 10 -- §8541, NPS will "... provide advanced instruction and professional and **technical education and research opportunities...**" Sponsored programs (research, education, and professional development) are integral to the Naval Postgraduate School mission. The research programs support graduate education by providing militarily relevant thesis topics that address issues from the current needs of the Fleet and Joint Forces to the science and technology required to sustain long-term superiority of the Navy/DoD. Research varies from the fundamental to the applied and covers all levels of classification. Sponsored research includes:

- Basic and Applied Research
- Individual and Interdisciplinary Group Projects
- Fleet Support
- Cooperative Research and Development Agreements

Sponsored education programs include integrated graduate education and research in space systems, total-ship systems engineering, combat systems, systems engineering and homeland security and defense, supplemented by off-campus graduate and certificate programs.

Professional development programs utilize NPS faculty expertise and student experience to support various communities within the Navy and DoD through short courses and web-based services.

SPONSORED PROGRAM EXPENDITURES

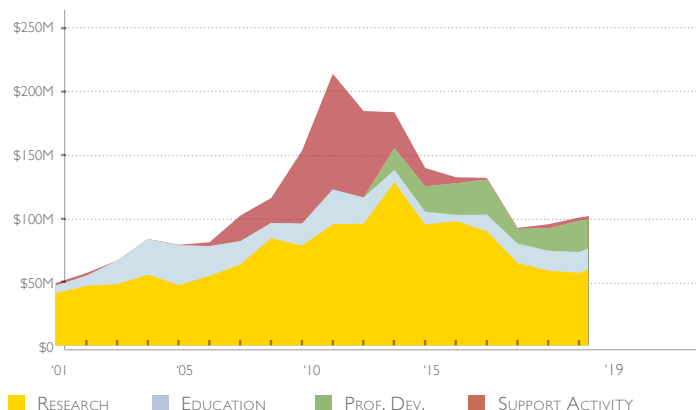

1 October 2018–30 September 2019

Total Expenditures: \$104.4M

BY TYPE OF ACTIVITY

SPONSORED PROGRAM PROFILE FY 2001-2019 (Funds Expended)

In FY19, NPS had available over \$108.6M (not including carryover funds from prior years) in sponsored program funding. Total expenditures in FY19 exceeded \$104.4M.

BY SPONSOR

* Navy funds include Naval Research Program (NRP) funding.

BY NPS ORGANIZATION

GRADUATE SCHOOL OF DEFENSE MANAGEMENT

The Graduate School of Defense Management (formerly Graduate School of Business and Public Policy) offers unique residential defense-focused MBA and Master of Science in Management programs, plus master's degrees in four other DoD-relevant areas. Faculty research is an important component of the school and strives to support military and public policy decision making, problem solving, and policy setting; improve operational and administrative processes, and organizational effectiveness; contribute knowledge to academic disciplines; and advance the mission of graduate education. Faculty research results have been featured in general media, used in Congressional testimony and incorporated in public policy issues.

The research program is fully integrated into the educational process. Curriculum sponsors and other DoD organizations fund faculty research; students participate in these faculty projects and undertake research of their own in their capstone MBA projects, and faculty research results are incorporated into classroom instruction. Topics and issues can be grouped into five broad functional areas: acquisition program and contracting management; budgeting and financial management; operations and logistics management; economics and manpower systems analysis; and management and leadership, strategy and change, and communications.

TOTAL EXPENDITURES: \$7.6m

BY DEPARTMENT

GRADUATE SCHOOL OF OPERATIONAL AND INFORMATION SCIENCES

GSOIS resident and distance learning programs consist of 21 technical curricula that award master of science and Ph.D. degrees across four academic departments (Computer Science, Defense Analysis, Information Science, and Operations Research) and the Cyber Academic Group. Responding to the needs of naval and military customers, graduate education and research focus on important military domains: information science and technology; computer science; artificial intelligence; cyber systems and operations; operations analysis and operational logistics; data science; human-systems integration; and special operations. The emphasis of sponsored research is on the development, integration, and application of mathematical, scientific, and technical skills that contribute to advances and improvement in military systems and operations, and related areas of national defense and security.

GRADUATE SCHOOL OF ENGINEERING AND APPLIED SCIENCES

GSEAS education leads to the master of science, engineer, and doctor of philosophy degrees awarded by seven technical academic departments (applied math, electrical and computer engineering, mechanical and aerospace engineering, meteorology, physics, oceanography, systems engineering) and three interdisciplinary academic groups (space systems, undersea warfare, and energy). These offer degree programs tailored to the Navy and defense community, while providing technical foundations for student theses interdisciplinary faculty and student research projects. Research centers and unique laboratory facilities (e.g., autonomous vehicle research, spacecraft research and design, remote sensing, rocket propulsion and combustion, electronic warfare & signal processing, ocean acoustics, atmospheric modelling & forecasting, multi-intelligence studies & data science, space-systems research, computer & communication networks, materials research, cyber warfare & cryptanalysis, undersea warfare, advanced sensors, and weapon effects & analysis) add rigor to the resident academic and sponsored programs.

TOTAL EXPENDITURES: \$41.9m

SCHOOL OF INTERNATIONAL GRADUATE STUDIES

The School of International Graduate Studies (SIGS) specializes in research and graduate education focused on security studies, international relations, regional security and area studies, international political economy, and U.S. security policy. Programs identify and address security challenges, develop civilian and military interagency alliances, and strengthen multilateral and bilateral defense cooperation between the U.S. and other nations.

SIGS components include the department of National Security Affairs, Center for Civil-Military Relations, Center for Homeland Defense and Security, and the International Graduate Programs Office.
