

NAVAL POSTGRADUATE SCHOOL

Commencement
Ceremony

SEPTEMBER 23, 2022

“We need leaders of character, leaders that speak the truth and always choose the harder right over the more convenient or expedient wrong. NPS has given you powerful tools, and we are relying on you to use them to make us stronger.”

Admiral Michael Gilday, USN
Chief of Naval Operations

“The complexity of the modern battlefield and increasing rate of change requires a highly educated force. While different, education and training are inextricably linked. Education denotes study and intellectual development. Training is primarily learning-by-doing. We will not train without the presence of education; we must not educate without the complementary execution of well-conceived training. As the 31st Commandant of the Marine Corps noted – “any mission undertaken by the Corps will flow directly from our ability both to train and educate every Marine.”

General David H. Berger, USMC
Commandant of the Marine Corps

NAVAL POSTGRADUATE SCHOOL

The Naval Postgraduate School provides an unparalleled learning and research environment. NPS is a place where operationally experienced officers from the joint services, civilians from various defense and homeland security organizations, and international students from nearly 60 countries come together to learn from, and work with, a world-class faculty focused on global security issues vital to our national security strategy.

The institution is responsive to rapidly emerging and ever-changing strategic and tactical requirements. Curricula are rigorously tailored to meet the nation's changing defense needs, while simultaneously maintaining the same high accreditation standards as civilian universities.

An NPS education extends far beyond the Monterey campus, reaching warfighters both at sea and in the field, engineers in defense laboratories, and international participants who are enrolled in distributed learning and professional education programs throughout the globe.

On any given day faculty and student research addresses critical real world requirements relevant to combatant commander and warfighter needs through a unique integration of government agencies, commercial enterprises, other notable research universities and our allies.

An NPS graduate has the intellectual know-how and the practical skills to make the most of today's resources. NPS graduates are the cornerstone for developing tomorrow's defense technologies, systems and programs.

The individual schools are accredited by the Western Association of Schools & Colleges, the Accreditation Board for Engineering & Technology, the Association to Advance Collegiate Schools of Business and the National Association of Schools of Public Affairs & Administration. Additionally, The North Atlantic Treaty Organization has recognized NPS as an Alliance-wide Partnership for Peace Education and Training Center.

...Master your future.
