

BOUNCE IMAGING

TACTICAL THROWABLE CAMERAS

Imagine for a moment what this soldier is feeling when ordered to enter that cave

Current tech **often doesn't help** in the real world

- Expensive
- Hard to Use
- Hard to Carry
- **Limited Field of View**

We deliver **instant 360°**
situational awareness

Bounce Imaging provides close-in situational awareness where robots and drones can't

System Advantages

360° Stabilized Video	Low-cost – 70%+ cheaper
Light-weight and small	Easy-to-use without training
Throwable or pole-mounted	Excellent for confined spaces

Typical Use Cases

Room clearing	Barricades	Surveillance	Confined Space
K9	Tunnels/SubT	Hostage Rescue	Search & Rescue

Integrated, patented hardware and software technology – with 5 patents

Software

- 200X faster than traditional stitching
- Noise/ quality resistant
- Flexible

Hardware

- Perfectly synchronized imagers and IMU
- Ruggedized for action
- Optimized for IoT and cloud

Demo video (autoplay) – Stabilization I

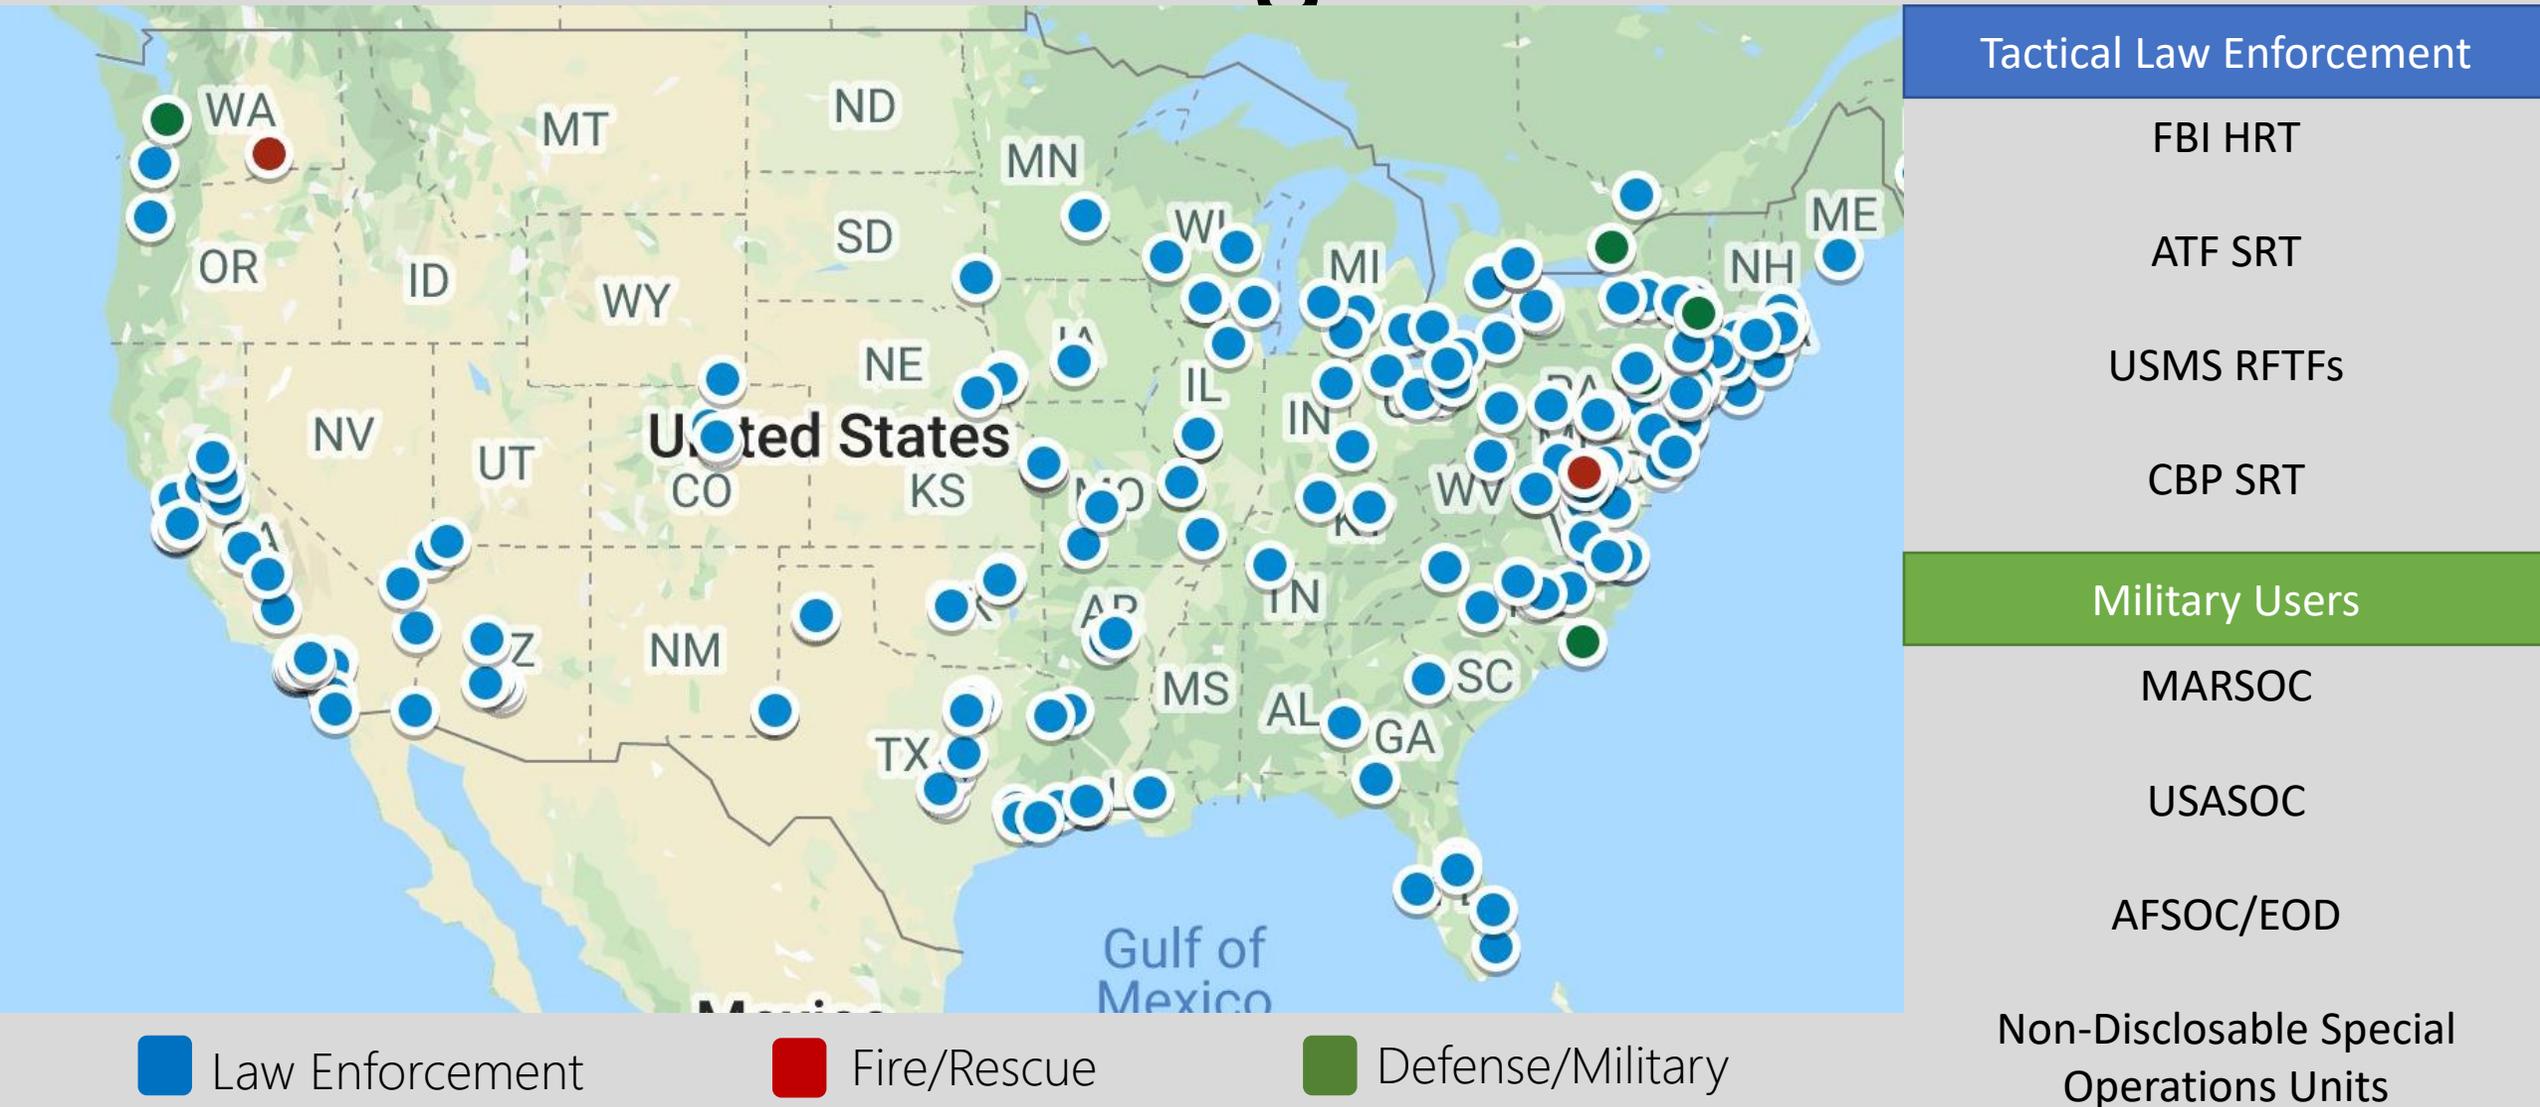

Unique calibration method allows for 200x faster stitching and stable video

- Three dimensional calibration coordinate system
- Genetic optimization for non-linear lens parameters
- Noise/ quality resistant
- Flexible

Our cameras are *already in use* by elite tactical users including within SOCOM

Proven Tech, New Opportunities

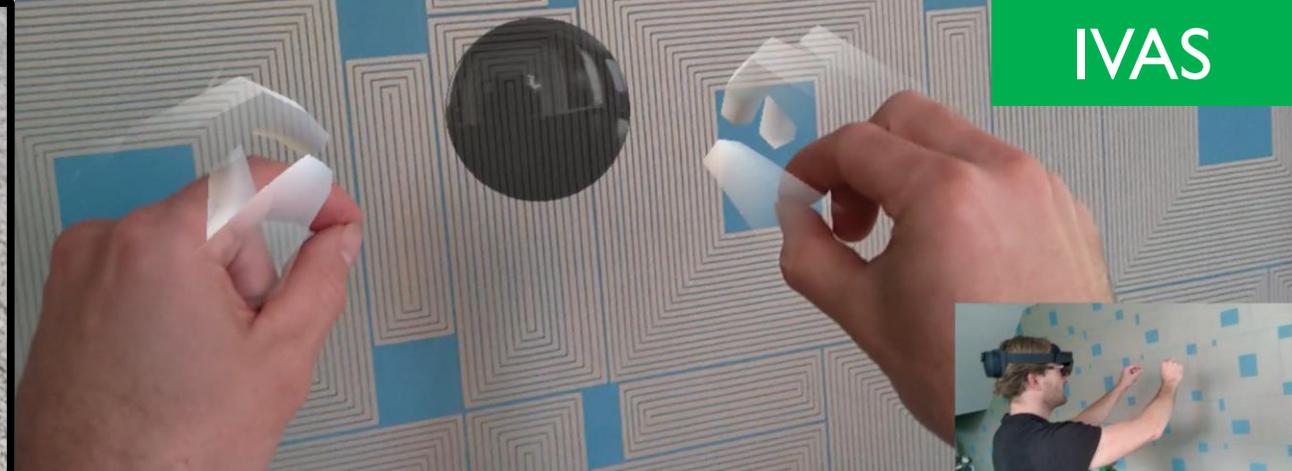

Proven Tech Available Now

Used As

Throwable Camera	K9 Camera
Pole Cam	SubT Cam
Throw-phone	Perimeter Camera
