

ECHO^x™

CONNECT | INSPIRE | REIMAGINE

WHAT IS ECHOX™ ?

- Our Innovative Platform
- Next Generation Technology
- Built in conjunction with US Military

WHAT WE DEVELOPED

- An electronic, digital audio card.
- Stores critical information to be disseminated to people in a chaotic post-disaster situations or for commercial use.
- Embeds a pre-recorded audio message and utilizes FM transmission to allow for mass communication to those in disaster effected areas.
- Live audio broadcast allows for instant transmission of message and updates. Despite damage done to television transmitters or cell phone networks, radio can broadcast emergency information to even the most remote locations.

TECHNOLOGY CAPABILITIES

- Programmable FM Station
- Live Broadcast
- Water Resistant
- GPS and tracking availability
- High security Capability
- Continuous Remote updating of the pre-recorded messaging capability
- Transmittable communication device up to 100 playbacks
- LoRa Technology availability
- Wi-Fi availability
- Airdroppable from 500m (1640ft)
(any terrain)
- RoHS Compliant
- Operating Temperature card Range
 - 10-130 degree F (-12.2 -54.4c)

ENHANCING REMOTE
EXPERIENCES IN
CURRENT MARKET
STANDARDS.

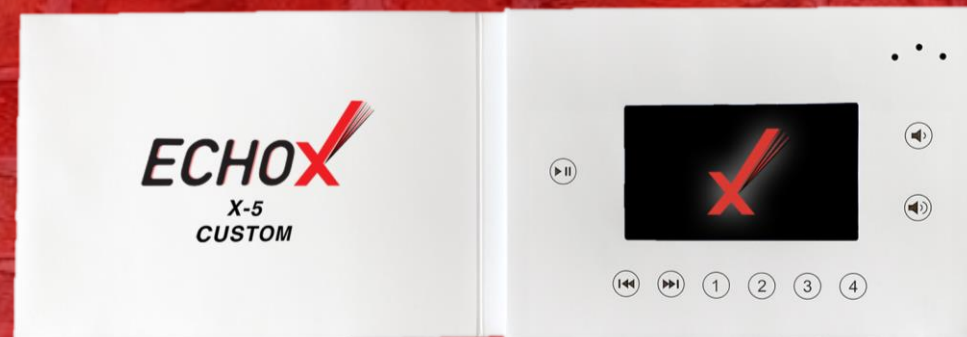

FEATURES

- Rechargeable batteries
- Basic functions (play/pause)
- Chapter control
- Custom Labeling
- Bluetooth
- Wi-Fi Capability
- Fully Customizable
- Lightweight

WHO IS OUR CURRENT AUDIENCE?

- Current Pilot programs
 - Future Plans
- Who should be interested in our capabilities

Compatible in:

- **HUMANITARIAN AID**
- **MILITARY OPERATION**
- **COMMERCIALIZED MARKETS**

KEY TAKEAWAY

- **UNIVERSAL IMPLEMENTATION ON MULTIPLE VERTICALS**
- **FULL SUPPLY CHAIN**
- **SECURITY FEATURES**
- **LIMITLESS CUSTOMIZATION**
- **NEXT GENERATION MASS COMMUNICATION**
