What We Do

By understanding how humans interact with video through our patented video robotic process automation (V-RPA) platform, Vidrovr helps global organizations manage misinformation risk, avoid costly mistakes, and monetize video assets.

Video Geo-Enabled Situational Awareness

PROBLEM

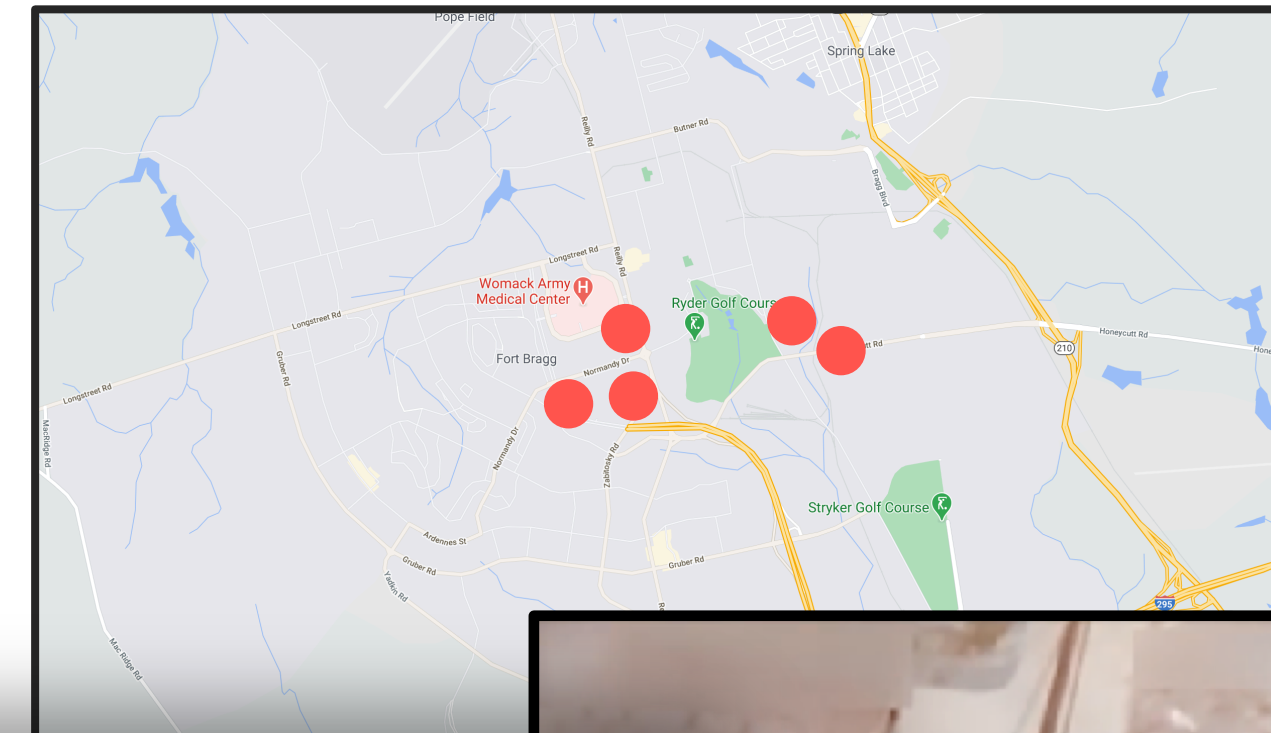

Damage to people and property in the federal sector costs the U.S. government and private organizations tens of billions of dollars a year.

SOLUTION

The Vidrovr Geo-Enabled Situational Awareness Solution provides customizable real-time alerts powered by analysis of live video feeds, with geo information.

VALUE

By preventing attacks, stolen property, and providing strategic knowledge in intelligence, reconnaissance, and real-world surveillance situations our clients can operate more efficiently and safely, offsetting millions of dollars in losses.
