CLIMATE & SECURITY NETWORK SPEAKER SERIES

Challenges of Climate Security & Governance Competition

30 November 2022 | 12:00 - 1:00 PM PT | Virtual via Zoom

Speakers

Major Matt Alexander, US Army

Major Alexander Kenna, US Army

This presentation features NPS students who will share their thesis work on how climate security events can be leveraged in governance competition, especially in vulnerable regions. The research includes the connections associated with Climate Security and Strategic Competition and how the DoD can best approach these challenges. Special focus will be applied to how climate change events can serve as a threat multiplier and how Army Special Operations Civil Affairs can assist in addressing the strategic geopolitical implications of climate security as it concerns the civil domain.

Major Matt Alexander is an Army Special Operations Civil Affairs Officer with over 11 years in service with deployments to Afghanistan, Colombia, and Trinidad and Tobago. He holds a Master of Arts in International

Relations from the University of Oklahoma and is currently a student in the Defense Analysis Department studying Information Strategy and Political Warfare at NPS.

Major Alexander Kenna is an Army Special Operations Civil Affairs Officer with over 11 years in service with deployments to Turkey, Afghanistan, Colombia, and Trinidad and Tobago. He holds a Master of Arts in Business Management from

the University of Webster and is currently a student in the Defense Analysis Department studying Information Strategy and Political Warfare at NPS.

Virtual via Zoom:
