# DEFENSE ENERGY / CLIMATE & SECURITY NETWORK SPEAKER SERIES

## Water for Energy (W4E): The Quiet Crisis in the Making and on Border Prosperity in USA-Mexico and Other Regions

October 31, 2023 | 12:00 - 12:50 PM  
Spanagel Hall, Room #321

### Luciano Castillo, PhD

Kenninger Professor of Renewable Energy  
& Power Systems in Mechanical Engineering,  
School of Mechanical Engineering, Purdue University

### About the Speaker

Luciano is the Kenninger Professor of Renewable Energy & Power Systems in Mechanical Engineering at Purdue University and also the associate editor of Wind Engineering & Science at Texas Tech University. He serves on various scientific committees on renewable energy in Europe. His areas of research interest include turbulence, renewable energy and bioengineering. Luciano has published over 100 publications, edited several books on renewable energy and has co-authored several patents.
