

SAMPLE ACKNOWLEDGMENTS

First and foremost, we would like to extend a special thanks to our wives, Autumn and Christen, for their continuous support and understanding throughout the research and development process of this project. We would also like to thank our advisors, Dr. Aruna Apte and Dr. Keenan Yoho; without their motivation and guidance, this project would not exist. Professionally, we must thank those commands that assisted in gathering data and answering questions. Specifically, we would like to thank ADM Stavridis and his keen interest in our project; his publication served as excellent guidance in the development of this project. We would like to thank RADM Buzby and his staff, CDR Redmond, John Quandt, and Hitch Peabody at Military Sealift Command, U.S. Fleet Forces Command, and RADM Pandolfe and his staff at OPNAV N86 for their support. Finally, we wish to thank RADM James Greene (Ret.) and Ms. Karey Shaffer with the Acquisition Research Program for sponsoring and assisting with this project.
