

COVID Travel Risk Assessment Management Worksheet (Rev 19OCT)

Navy Service Members should not travel if they display a fever or other symptoms consistent with COVID-19 or if they have had close contact with someone who has tested positive for COVID-19 within the past 14 days.

Navy Service Members will comply with any DoD, component, federal, state and local restrictions while in a leave/liberty status.

Commanders and supervisors will establish a means of communication with all Navy Service Members throughout the period of leave or liberty and post-travel actions as well as prescribing actions (i.e., post-travel ROM, if applicable) for their particular circumstances.

Navy commanders and supervisors may be more restrictive based on local risk assessment in consultation with public health authorities.

Additional considerations for commanders:

- Type of command
- Mission Assurance status
- Employment / OFRP Phase
- Exposure to high risk individuals at work / at home
- Higher Echelon Guidance, SOG 3.0, etc.
