

Decarb Meeting Chat: 12 May 2023

10:50:36 From Subith Vasu (UCF) to Everyone:

<https://www.iea.org/reports/towards-hydrogen-definitions-based-on-their-emissions-intensity>

10:51:17 From Subith Vasu (UCF) to Everyone:

There is new IEA recommendation to get away from color coding

11:11:02 From Ronald Giachetti (NPS) to Everyone:

I suggest changing the category name of “energy efficiency technology” to “energy efficiency” because adding the word technology biases to technical solutions, rather than good design leading to more efficiency. For example, there’s a lot of ways to make buildings more efficient, but we (society) in general don’t do it.

11:20:53 From Scott Coombe to Everyone:

Bill, feel free to follow up with me to capture research of interest in the P&E Focus Area highlighted on chart 6.

11:26:50 From William Mustain to Everyone:

This was great

11:29:54 From Kirk Waltz, American Bureau of Shipping (ABS) to Everyone:

Would supply chain resilience be a useful study? With DLA perhaps?

11:31:02 From cayle.a.bradley to Everyone:

Yes. DLA engagement will key when we start talking supply chains of any fuel source.

11:58:17 From Dianne Luning Prak to Everyone:

Thanks everyone.
