# Advanced Maritime Counter-Unmanned Aircraft System (C-UAS) Technologies

**Mission Need:** Operationally effective C-UAS force protection capability.

## Objectives
- Assess new developments in kinetic C-UAS solutions in the open market and with other government agencies as technologies mature.
- Automate object detection and classification based on Electro-Optical/Infrared camera data by collaborating with optics companies to incorporate additional sensor modalities to aid UAS detection and target discrimination.
- Explore applicability of data fusion algorithms and machine learning to combine multiple data types into single threat track to reduce operator workload, uncertainty, and response time.
- Provide technical guidance on system employment for various mission sets based on legal authority and tactics, techniques, and procedures.

## Notes
- Follow-on for RDC Project 7812 “Maritime Counter Unmanned Aircraft Systems.”

## Sponsor: CG-MSR  
**Stakeholder(s):** CG-711, CG-721, CG-751, LANT-3, PAC, D1, NSWC Dahlgren, AFRL, ONR, CGCYBER  

**RDC Research Lead:** C-UAS Research Team  
**CG-926 Domain Lead:** C-UAS Research Team  

**Anticipated Outcome/Transition:** Provide Sponsor/Product Line Tested Prototype Recommendations for Acquisition Milestone Support  

**Project Timeline / Key Milestones**

5
Maritime Unmanned System Technology (MUST)

Mission Need: Persistent maritime domain awareness using AUSVs.

Objectives

- Assess potential employment options using Autonomous Underwater and Surface Vehicles (AUSV) to support U.S. Coast Guard (CG) mission areas. Using modeling and simulation techniques, assess AUSV Concept of Operations, including:
  - Effectiveness of single and multiple AUSVs; and
  - Effectiveness of AUSV and unmanned aerial system teaming.
- Inform field testing using modeling analysis results.

Notes

- Partner with the U.S. Department of Homeland Security (DHS) Science, Technology Directorate (S&T) Borders, Immigration and Maritime (BIM), U.S. Naval Research Laboratory, Naval Undersea Warfare Center, Naval Surface Warfare Center – Dahlgren Division.

Sponsor: DHS S&T BIM, CG-26

Stakeholder(s): CG-721, CG-MLE, CGCYBER, FORCECOM

RDC Research Lead: Mr. Ross Vassallo

CG-926 Domain Lead: Mr. Scott Craig

Anticipated Outcome/Transition:

- Recommendations on Tech Availability & Applicability
- Recommendations for Tactics, Techniques & Procedures

Aviation Branch Support

**Mission Need:** Maintain competency/knowledge; provide rapid response; and external liaison.

**Objectives**
- Maintain U.S. Coast Guard (CG) Research and Development Center (RDC) competency and technical knowledge in understanding present and future aviation and test and evaluation technology/systems including: manned and Unmanned Aircraft Systems (UAS), mission analysis, wide area surveillance, search and rescue, and persistent/strategic Maritime Domain Awareness (MDA).
- Maintain Branch infrastructure to support CG RDC portfolio objectives.
- Support Aviation Strategic Project Portfolio Alignment and CG DCO/DCMS Research Priorities.
- Provide expert input to CG stakeholders regarding aviation technologies.
- Foster continued relationships with CG sponsors/stakeholders and external U.S. Department of Defense labs, U.S. Department of Homeland Security (DHS) Science and Technology Directorate (S&T), and other government agency/academic partners.
- Provide service academy, Historically Black College or University, and Minority serving Institution students internship opportunities.

**Notes**
- Nexus for research and development unmanned efforts.
- Participating in CG Unmanned Systems Integrated Product Team (IPT).
- Participating in Medium Range UAS IPT and Small UAS Work Group.
- Partnered with Air Force Research Laboratory Agility Prime Electric Vertical Takeoff And Landing aircraft work.
- Partnered with SOUTHCOM research efforts.

**Sponsor:** CG-926  
**Stakeholder(s):** CG-41, CG-711, CG-721, CG-931, CG-SAR, ALC, DHS S&T

Modernizing Law Enforcement Encounter Background Checks at Sea

Mission Need: Real-time, relevant information to the boarding team.

Objectives

- Improve the current process for Law Enforcement personnel to enable faster and more accurate results delivered on-scene directly to the Boarding Officer by building and deploying a prototype in the field to be evaluated by Boarding Officers and Intelligence Coordination Center (ICC) Coastwatch experts.
- Ensure alignment of efforts for modernization and compatibility with the new mobile MISLE application called ENFORCE.
- Enable a modernized, “plug-in” process for the background check functionality within the new ENFORCE mobile application.

Notes

- Partner with the National Urban Security Technology Laboratory, U.S. Department of Homeland Security Criminal Investigation and Network Analysis Center of Excellence, Transportation Security Administration, and U.S. Customs and Border Protection to explore technologies being used.
- Partner with CG-MLE Biometric project team to leverage parallel technologies for a one-solution-fits-all goal.

Sponsor: CG-MLE
Stakeholder(s): CG-26/25/721/761, ICC, CG-MSR, C5ISC, LANT, PAC, CGIS, CGCYBER, FORCECOM

**High Frequency (HF) Radar**

**Mission Need:** Enhance Maritime Domain Awareness (MDA) in the U.S. Exclusive Economic Zone (EEZ).

**Objectives**
- Assess High Frequency Surface Wave Radar (HFSWR) tracking and communications capabilities of existing systems with government and commercial partners.
- Evaluate HFSWR applicability to U.S. Coast Guard (CG) missions through a technology demonstration with partner organizations at an established site.
- Investigate the data fusion analysis framework for possible CG integration and transition with the Maritime Intelligence Fusion Centers (MIFC).
- Identify the locations with greatest utility and return on investment for potential fielding of HFSWR to enhance MDA within the EEZ.

**Notes**
- Partnership opportunities include the National Oceanic and Atmospheric Administration, Naval Postgraduate School, the U.S. Department of Homeland Security (DHS) Science and Technology Directorate (S&T) - Borders, Immigration and Maritime (BIM), Naval Research Laboratory (NRL), U.S. Southern Command (SOUTHCOM), Joint Interagency Task Force-South (JIATF-S), and the Commander, USN 4th Fleet Science Advisor.

**Project Timeline / Key Milestones**

- **Project Start:** 1 Oct 20
- **Completed HFSWR Capabilities Research** 17 Mar 21 ✓
- **NRL Completed HF Data Collection, Analysis, and Report** 3 Aug 21 ✓
- **High Frequency Radar Capabilities for MDA (Brief)** 12 Oct 21 ★
- **Technology Demonstration** Aug 22
- **Applicability to CG Missions Identified** Oct 22
- **High Frequency Surface Wave Radar for CG Operations (Report & Brief)** Jan 23 ★

**Sponsor:** CG-761

**RDC Research Lead:** Mr. Sekaran Jambukesan

**CG-926 Domain Lead:** Ms. Holly Wendelin

**Anticipated Outcome/Transition:** Recommendations on Tech Availability & Applicability

**Project Completion:** Jan 23
### Mission Need: Long-range communication options ranked for each mission set and environment.

- Determine an optimized list of long range communications (LRC) options for each U.S. Coast Guard (CG) mission in each area of operation, met with available or near term available equipment. This will be accomplished by:
  - Developing a Beyond Line of Sight (BLOS) Cutter Survey and conducting focus group and site surveys in all districts for Fast Response Cutters (FRC) and larger assets.
  - Identifying baseline, new, and emerging long-range communications options to include technologies such as:
    - Low, medium, and High Frequency (HF).
    - Satellite communications (SATCOMMS).
    - 3G/4G/5G Automatic Link Establishment (ALE).
  - Developing a comprehensive matrix assessing the results of surveys and site visits by mission and geographic area.

- Leverage CG-761-developed Capabilities Based Assessment on current state of U.S. Coast Guard long-range communications.
- Share findings with Southern Command (SOUTHCOM) and Joint Interagency Task Force-South (JIATF-S) facilities and long range communications capabilities and other potential U.S. Department of Defense research laboratories solutions as needed.
- Share findings with Naval Postgraduate School to identify long range communications collaboration opportunities.

### Project Timeline / Key Milestones

### Anticipated Outcome/Transition:

Recommendations for Tactics, Techniques & Procedures
Mission Need: Consolidate disparate data to modernize marine environmental response.

Objectives

- Leverage existing systems such as the National Oceanic and Atmospheric Administration’s Environmental Response Management Application (ERMA) to create a central hubs of resources to improve response planning and operations.
- Work with the sponsor office and CGA to build a subsystem to ERMA to incorporate maritime environmental response actions and data layers.
- Connect maritime environmental response data from existing systems to the CG network to enable data fusion and overlay development.
- Collaborate with the ERMA program to create the Maritime Environmental Response (MER) Common Operating Picture (COP) to leverage existing system capabilities and create data overlays, such as chart based depictions of environmentally sensitive areas and legal or doctrinal constraints that could impact the response effort.

Notes

- This effort will also explore the iPAC system from the U.S. Fish and Wildlife services.

Sponsor: CG-MER
Stakeholder(s): CG-5R, CG-67, CG-68, CG-741, C5ISC, CGCYBER, CGA

RDC Research Lead: Mr. Benjamin Berman

Project Completion: Sep 23
Mission Need: Accurate and timely field imagery and data from response teams.

Objectives:
- Identify an efficient electronic means for field teams to quickly and accurately communicate data such as vessel damage assessments, Shoreline Cleanup Assessment and Technique forms, facility assessment forms for the Marine Transportation System Recovery Unit, Aids To Navigation verification, and other needed data.
- This effort will:
  - Assess existing mobile applications such as DAART, MAGE, TAK, and Microsoft 365 mobile functionality.
  - Create a Damage Assessment Go-Kit for mobile field teams to use and evaluate after a major storm.
  - Determine the feasibility of connecting data and developing custom views in a common operating picture (COP) such as Coast Guard 1 View (CG1V), FirstNet dispatch console, and the Naval Research Laboratory’s PROTEUS global Maritime Domain Awareness (MDA) system.

Notes:
- Explore the U.S. Army Space and Missile Defense Command's Domestic Operations Awareness and Assessment Response Tool (DAART), the National Geospatial-Intelligence Agency’s (NGA) Mobile Awareness GEOINT Environment (MAGE), and the Team Awareness Kit (TAK) as potential government-off-the-shelf (GOTS) solutions.
- Consider partnerships with the National Oceanic and Atmospheric Administration (NOAA), Federal Emergency Management Agency (FEMA), and Natick Soldier Systems Center TAK lab.

Anticipated Outcome/Transition:
- Provide Sponsor/Product Line Tested Prototype

Sponsor: CG-OEM

# Command, Control, Communications, Computers, Cyber, & Intelligence (C5I) Branch Support

## Mission Need: Maintain competency/knowledge; provide rapid response; and external liaison.

### Objectives

- Maintain U.S. Coast Guard (CG) Research and Development Center (RDC) competency and technical knowledge in understanding present and future C5I systems, including: radio frequency communications, electronic navigation systems, software defined radios, cyber security systems, spectrum management, and sensors.
- Maintain Branch infrastructure to support RDC portfolio objectives.
- Support C5I Strategic Project Portfolio Alignment, CG Cyber Strategic Outlook initiatives, and CG DCO/DCMS Research Priorities.
- Provide expert input to CG stakeholders regarding C5I technologies.
- Foster continued relationships with CG sponsors/stakeholders and external U.S. Department of Defense (DOD) labs, U.S. Department of Homeland Security (DHS) Science and Technology Directorate (S&T), and other government agency/academic partners.
- Provide service academy, Historically Black College or University, and Minority Serving Institution students internship opportunities.

### Notes

- Develop a “Sector of the Future” lab setup to assess how technology can transform Sector-level operational decision making and communications.
- Continue to provide Extended Reality subject matter expertise and technical support for HoloLens2 devices in support of RDC ITNET Branch.
- Support Polar Communications testing for RDC and DOD Labs collaborative projects.
- Participate with C5I organizations such as the Radio Technical Commission for Maritime Services (RTCM) and Institute of Navigation.

### Sponsor: CG-926

### Stakeholder(s):

- CG-2, CG-6, CG-7, CG-933, C5ISC, CGCYBER, DHS S&T

### Project Completion: Ongoing
**Mission Need:** Improve SAROPS utility by incorporating better survival modeling and statistics.

- Improve Search and Rescue survival decision tools by incorporating methods that better account for survival time in warmer water (15°C (59°F)) and incorporating survival factors beyond heat production and heat loss.
- Develop a dynamic database to validate model(s) against statistics, and permit model fine-tuning as the database grows.
- Provide the Search and Rescue program an easily-integrated survival module that allows two-way compatibility with existing Search and Rescue Optimal Planning System (SAROPS) processes.

**Notes**
- Carries forward U.S. Coast Guard (CG) Research and Development Center survival-related work with U.S. Department of Defense labs (John Hopkins University/Applied Physics Lab).
- Explore partnerships with National Labs and University Centers including the U.S. Naval Experimental Diving Unit (NEDU), U.S. Army Research Institute of Environmental Medicine (USARIEM), and U.S. Navy Clothing and Textile Research Facility.

**Objectives**

**Project Completion:** Dec 22
Mission Need: Reduce Nonindigenous Invasive Species (NIS) transport risks in U.S. waters by vessel.

- Determine the most practical BWM practices for Laker operators to reduce the risks of transporting NIS from one region of the Great Lakes (GL) to another when they are introduced from the outside by ocean-going ships.
- Research and develop robust, science-based technical Quality Assurance (QA) protocols to validate sub-Independent Lab (IL) QA/Quality Control shipboard test programs that support BWM System (BWMS) Type Approval (TA).
- Provide a tested Ballast Water Discharge Standard (BWDS) compliance tool to the field.
- Provide robust, science-based, shipboard-test technical protocols to validate IL test programs.
- Assess CG’s Ballast Water Management Regulatory Program.

- FY18-FY20 Great Lakes Restoration Initiative funding (DW-070-95926401-0), (DW-070-20000108-0), (DW-70-95953301–0).
- Collaboration with Naval Research Laboratory.
- Collaboration with Smithsonian Environmental Research Center.
- Collaboration with the U.S. Department of Transportation Maritime Administration, Canadian Department of Fisheries & Oceans, and Transport Canada.

Mission Need: Enhanced decision-making for response to dilbit spills in the fresh water environment.

Objectives

- Provide the U.S. Coast Guard (CG) Federal On-Scene Coordinators with decision-making guidance as they relate to the fate and transport of dilbit in the freshwater environment.
- Study the behavior (density and weathering) and response tools of dilbit spills in the freshwater environment.

Notes

- Supported by Great Lakes (GL) Restoration Initiative funding.
- Leverage RDC Project 4705 “Oil Sands Products Spill Response.”
- Collaborate with the International Institute for Sustainable Development’s Experimental Lakes Area and U.S. Department of Energy labs.

## Mission Need:
Technologies to detect and characterize oil spills in ice environments.

### Objectives
- Coordinate and conduct multi-agency lab and field tests to gain better understanding of aerial and underwater sensor capability in characterizing oil on the surface or in the water column in ice conditions.
- Determine remote vehicle telemetry capability to transfer sensor data to on-scene responders or Incident Command as actionable information.

### Notes
- Oil Spill Liability Trust Fund funding.
- Partnerships with the Cold Regions Research and Engineering Laboratory (CRREL), Woods Hole Oceanographic Institute (WHOI), U.S. Department of Homeland Security (DHS) Science and Technology Directorate (S&T) Office of University Programs (OUP), National Oceanic and Atmospheric Administration’s (NOAA) Office of Response and Restoration (OR&R), Bureau of Safety and Environmental Enforcement, and U.S. Environmental Protection Agency.

Private Aids to Navigation Verification Improvements

Mission Need: Modernize the Auxiliary reporting system for PATON verification.

Objectives:
- Automate and standardize data collection for Private Aids to Navigation (PATON).
- Research how each District performs and records PATON verification.
- Evaluate and develop potential solutions to increase efficiency and effectiveness.
- Standardize how the U.S. Coast Guard (CG) documents PATON verification.
- Transition results to the Office of Navigation (CG-NAV) for implementing a service-wide PATON verification tool.

Notes:
- RDC Auxiliary Unit to coordinate national participation for project execution.
- Leverage existing, Auxiliary-developed PATON verification tools and processes.
- Capitalize on Auxiliarist information technology capability for mobile-application development.
- Partner with National Oceanic and Atmospheric Administration and United States Army Corps of Engineers.

Sponsor: CG-NAV
Stakeholder(s): CG Auxiliary, Districts, NAVCEN, CG-68
RDC Research Lead: Mr. James Spilsbury
CG-926 Domain Lead: Ms. Karin Messenger

Anticipated Outcome/Transition: Provide Sponsor/Product Line Tested Prototype

Project Timeline / Key Milestones:
- Project Start: 1 Oct 21
- Complete Market Research: 30 Nov 21
- Complete Defining Functional Characteristics: 7 Dec 21
- Key Decision Point #1 - Decision on PATON Tool: 7 Dec 21
- Private Aids to Navigation Improvements Project Status (Brief): 2 Feb 22
- Complete Prototype Design: Aug 22
- Key Decision Point #2 - CG Approval of Design: Sep 22
- Complete Testing of Prototype: Dec 22
- Private Aids to Navigation Verification Improvements (Report): Apr 23
- Project Completion: Apr 23
Nearshore and Inland Evaluation of the Estimated Recovery System Potential (ERSP) Calculator

Mission Need: ERSP calculator to include response systems for nearshore/inland operating environment.

- Determine if an enhanced version of the existing offshore ERSP calculator provides improved efficiency for planning and response to oil spills.
- Develop an inland ERSP calculator prototype tool.
- Validate ERSP calculator functionality and usefulness through an independent evaluation by a group of National Academies of Sciences, Engineering, and Medicine reviewers.

Sponsor: CG-MER
Stakeholder(s): BSEE, AREAs

RDC Research Lead: Mr. Alexander Balsley, P.E.
CG-926 Domain Lead: Ms. Karin Messenger

Anticipated Outcome/Transition: Provide Sponsor/Product Line Tested Prototype

Project Timeline / Key Milestones

- Project Start: 1 Oct 16
- Feasibility Workshop Completed: 21 Jun 17
- Feasibility of Extending the ERSP Calculator for Nearshore and Inland Waterways (Report): 20 Sep 17
- Inland ERSP Preliminary Factors, Requirements and Conceptual Model (Report): 14 Nov 19
- Inland ERSP Operational Environment Calculator (Design Document): 29 Jun 20
- Initial Development of Inland ERSP Calculator Complete: 4 Jun 21
- National Academy of Sciences (NAS) Review Complete: Aug 22
- NAS Response Review of Inland ERSP (White Paper): Dec 22
- NAS Recommended ERSP Calculator Updates Complete: Dec 23

Project Completion: May 24

Oil Spill Liability Trust Fund funding.

Emerging Pollution Response Technology Evaluation

**Mission Need:** Understand the capability of emerging mechanical pollution-response technology.

**Objectives**

- Conduct market research to identify new and emerging pollution response technologies.
- Conduct independent evaluation of select technologies using the U.S. Coast Guard’s (CG) Oil Spill Response Technology Evaluation Process.
- Collaborate with other Federal agencies (Bureau of Safety and Environmental Enforcement (BSEE), Environmental Protection Agency, etc.) to conduct in-water testing of the most promising technologies.
- Provide feedback to equipment providers for consideration in advancing their technologies to enhance the nation's pollution response capability.
- Provide a knowledge product for Federal On-Scene Coordinator (FOSC) awareness of new technologies.

**Notes**

- Oil Spill Liability Trust Fund funding.
- Partnership with BSEE.
- Possible use of Cooperative Research and Development Agreements.
- Opportunity to partner with Interagency Coordinating Committee for Oil Pollution Research (ICCOPR) members, Federal Laboratory Consortium members, and academic institutions involved in this area of research.
- Possible collaboration with Blue Technology Center of Expertise (BTCOE) for technology market research.

**Sponsor:** CG-MER

Mission Need: Improve response readiness to hazardous substance pollution release incidents.

Objectives:
- Address hazardous substance pollution risk knowledge gaps in Area Contingency Plans.
- Identify and analyze existing hazardous substance response technologies, capabilities, and resources.
- Provide reference guidance for area contingency planners.
- Enhance Captain of the Port (COTP) and Federal On Scene Coordinators (FOSC) response capabilities.
- Support inclusion of hazardous substance release response resources in facility and vessel response plans.

Notes:
- Coordinate with area contingency planners to connect project focus with specific field needs.
- Engage with the U.S. Environmental Protection Agency (EPA) emergency response program, CG National Strike Force Coordination Center (NSFCC), firefighters and other local hazardous-materials responders to leverage existing hazardous substance pollution response expertise.

**Mission Need:** Modernize U.S. Coast Guard (CG) Aids to Navigation (ATON) buoys and moorings.

**Objectives**
- Determine the world-wide state of non-ferrous, Next Generation (Next Gen) aids to navigation (ATON) buoys.
- In conjunction with CG managers, field trial the most-promising prospects for replacing steel buoys.
- Provide CG managers technical, cost, and operational benefits (if any) to modernize buoy inventory.
- Conduct follow-up investigation of an alternative buoy-mooring system to determine CG applicability.
- Analyze buoy inventory to identify logistical and operational inefficiencies.
- Develop science-based, analytical tool to aid CG managers with future inventory decisions.
- Field trial and evaluate promising inland river buoy alternatives.
- Evaluate the radar signatures of legacy and Next Gen buoy designs.
- Evaluate mooring analysis software replacement options.

**Notes**
- Coordinate with CG-NAV and the Data Center Optimization Initiative to involve to involve International Association of Marine Aids to Navigation and Lighthouse Authorities as partners.
- Collaborate with Naval Sea Systems Command on buoy radar cross section and detection ranges analysis.
- Coordinate with CG-68 on the transition of MOORSEL replacement.

October 2022 24
Investigate Effects of Wind Farms on Search and Rescue (SAR)

Mission Need: Research the impacts of wind farms on CG SAR.

- Literature review to determine current state of wind farms.
- Workshop with sponsor and stakeholders to identify SAR impacts of wind farms and mitigation strategies.
- Real-time wind and current measurements to account for changes due to wind turbines on wind farms.
- Sensor performance analysis to research how mitigation strategies will affect the CG's ability to find search objects near the wind farms.
- Field tests to determine the impact to search object detection using prioritized sensors at the Block Island, RI wind farm.

Objectives:

- Partnership with the National Oceanographic and Atmospheric Administration Integrated Ocean Observing System.
- Partnership with the Bureau of Energy Management.
- International partners (United Kingdom, Denmark, Norway, Dutch, Sweden).
- Possible collaboration with State Maritime Academies.

Notes:

Evaluate Visibility of Colors for CG Approved Lifesaving Equipment in Marine Conditions

**Mission Need:** Optimal lifesaving equipment detectability.

### Objectives
- Conduct literature review of High Visibility Safety Apparel (HSVA) and lifesaving equipment visibility/probability of detection research.
- Carry out industry/professional society review of standards for HSVA and Search and Rescue (SAR) equipment colors and/or color schemes.
- Perform domestic and international governmental review of approved/required colors in SAR scenarios.
- Define optimal visual detectability and conspicuity color characteristics in marine conditions via a marine environment high visibility color standard.
- Conduct field trials to validate high visibility color standard from shore, afloat and aviation assets in various weather, light and sea-state conditions.
- Provide findings to project sponsor and stakeholders for use in lifesaving equipment color evaluations and standards revision, if appropriate.

### Notes
- Engage CG RDC vision research subject matter experts to leverage in-house expertise, as well as CG Auxiliary for experimentation support.
- Review previous RDC visibility, visual distress signal, and detectability projects for experiment techniques, findings and conclusions.
- Global maritime stakeholders review results, revisit and revise domestic and international policy and regulations, if appropriate.

## Mission Need: Improve DSF and Cutter boarding team safety, security, and mission efficiency.

### Objectives
- Define protected, standards based mobile architectures to interface with U.S. Coast Guard (CG) Maritime and Avionic Systems.
- Phase 1:
  - Document and provide undocumented Deployable Specialized Forces (DSF) and Boarding Team (BT) requirements to sponsors/stakeholders.
  - Deliver best in class ranking of COTS and GOTS tactical mobile technology market research to support fast CG technology transition and integration.
- Phase 2:
  - Validate Market Research data through Limited User Evaluation of best in class tactical mobile technologies.
  - Deliver best in class solution architecture roadmap options to sponsor & stakeholders.
  - Deliver Improved DSF/Cutter BT Efficiency Report to key decision makers to drive CG wide change.
  - Examine use of LiDAR, Hazard Warning, and Biometrics Technology by BT members and how technology is integrated into Tactical Comm’s Toolkit.

### Notes
- Partner with the Air Force Institute of Technology (AFIT) to leverage systems engineering modeling capability.
- Interview CG BT/Law Enforcement Detachment, U.S. Department of Defense, U.S. Department of Justice, DHS, and BT policy makers to identify functional characteristics in an ideal and an acceptable scenario.
- Potential collaboration with the Naval Post Graduate School (NPS) Initial Research Estimate Form (IREF) compressed video request.

# Geospatial Cloud Analytics Integration with CG1V for IUU Fishing Detection

## Mission Need:
Detect, track, and display IUU fishing activity for Maritime Law Enforcement operations.

### Objectives
- Determine requirements for Illegal, Unreported and Unregulated (IUU) Fishing Activity detection and display.
- Determine existing IUU Fishing detection and display capabilities.
- Identify gaps between IUU Fishing requirements and capabilities.
- Develop mitigation strategies for identified gaps. Include the following areas:
  - Defense Advanced Research Projects Agency (DARPA) Geospatial Cloud Analytics (GCA) platform.
  - Coast Guard One View (CG1V) geographic display.
  - Global Fishing Watch (GFW) solutions.
  - Environmental Services Research Institute (Esri) solutions.

### Notes
- Previous RDC IUU work has been accomplished with GFW. This project will leverage that effort as much as possible.
- Identify key players in the DARPA GCA, CG1V and CG-MLE areas to obtain required subject matter expertise in these areas.
- Possible collaboration with the Intel Coordination Center (ICC) and U.S. Coast Guard Maritime Intelligence Fusion Center Pacific (MIFC PAC) and U.S. Guard Maritime Intelligence Fusion Center Atlantic (MIFC LANT).

High Latitude Underway Connectivity

Mission Need: Provide network connectivity to Cutters operating at high latitudes.

Objectives:
- Influence the desired minimum connectivity functional characteristics by analyzing previous U.S. Coast Guard (CG) Research and Development Center (RDC) arctic communications and cutter connectivity projects within last 10 years.
- Influence the desired minimum connectivity functional characteristics by analyzing prior U.S. Department of Defense (DoD) High Latitude (Hi-Lat) research projects within last 10 years, including U.S. Navy (USN) and North Atlantic Treaty Organization Combined Joint Operations from the Sea.
- Build and test a Hi-Lat cutter connectivity test bed.
- Deploy a prototype solution and perform a limited user evaluation and report on system capabilities for best in class determination.

Notes:
- Leverage RDC Projects 6208 “Arctic Communications Technology Assessments,” 8702 “Evaluate Network Accelerator Technology to Improve Cutter Information Technology Performance,” and 7759 “Evaluation of Potential CG Use of CubeSats.”
- Partner with the U.S. Department of Homeland Security Science and Technology Directorate Office of University Programs; USN Stratospheric Community of Interest; and Command, Control, Communications, Computers, Cyber, and Intelligence Service Center (C5ISC) Deployed Connectivity Section.
- Align with C5ISC SATCOM procurement.
- Link with DoD Lab Sync Arctic Comms effort and International Cooperative Engagement Program for Polar Research.

Project Start: 1 Oct 20
Project Completion: Mar 24
Mission Need: Improve efficiency and effectiveness of maintenance and training across the CG.

- Enhance the U.S. Coast Guard’s (CG) ability to train personnel and perform maintenance on CG assets by identifying maintenance, training, tools, processes, and procedures used by military and industry that will:
  - Reduce the labor burden of technicians by providing current maintenance information via XR technologies.
  - Increase the availability of assets by improving the efficiency of maintenance and reducing costly errors.
  - Improve the effectiveness of training and reduce the time to train personnel.
- Create a roadmap that will enable the sponsor to generate requirements and successfully implement extended reality capabilities throughout the CG to improve the performance of mission support services.

Notes:
- Includes partnerships with Naval Sea Systems Command Portsmouth Naval Shipyard, Microsoft Technology Center Boston, and other U.S. Department of Defense components that have successfully adopted XR technologies in their mission support programs.
- Uses agile scrum development and rapid contracting through Defense Logistics Agency’s Tailored Logistic Support Program.

**Mission Need:** Determine VDES benefits and path to implementation to support CG operations.

**Objectives**
- Understand the capabilities and limitations of VDES.
- Identify steps for U.S. Coast Guard (CG) Implementation of VDES.
- Identify steps to shift CG tactical data transmissions from AIS channels to VDES application specific message channels.
- Evaluate VDES capabilities to disseminate various types of Maritime Safety Information (MSI).
- Understand the requirements for CG shore-side management of VDES.
- Assess technical limitations of VDES R-Mode to include reliability and accuracy.
- Assess feasibility of VDES R-Mode implementation in the United States.
- Investigate the ability to use VDES R-Mode to detect position spoofing efforts by bad actors.

**Notes**
- Work closely with the Canadian Coast Guard; Electronics and Information Services, Quebec; U.S. Army Corps of Engineers, Engineer Research & Development Center.
- Leverage prior CG Research and Development Center work completed concerning options and impacts for VDES and AIS.

**Evaluation and Testing of VHF Data Exchange System (VDES) Impacts on the Automatic Identification System (AIS)**
## Mission Need: Effective and modernized distress communications for Alaska and Arctic.

- Evaluate current environmental and geographic challenges of the existing emergency communications system, Rescue 21 (R21) Alaska, in D17.
- Identify potential i911 integration opportunities with commercial Satellite (SAT) phones.
- Develop technology roadmap that can be shared with partners.

### Objectives

- Leverage findings from RDC Project 8503 “Radio Frequency (RF) Communications in a Cloud Environment.”
- Leverage partnerships within the U.S. Department of Defense (DoD) and U.S. Department of Homeland Security for alternative distress communications methods (i.e., space, near-space/stratospheric balloon).
- Project will identify possible synergies with the DoD Lab Commander Sync and seek to leverage the Ted Stevens Center for Arctic Security Studies.

### Notes

- Anticipated Outcome/Transition: Recommendations in Tech Availability & Applicability
- Stakeholder(s): CG-68, CG-67, CG-741, CG-SAR, CSISC, CGCYBER, AFRL, Space Force
- RDC Research Lead: LCDR John Forster

**Mission Need:** Maintain competency/knowledge; provide rapid response; and external liaison.

- Build U.S. Coast Guard (CG) Research and Development Center (RDC) competency and technical knowledge/understanding of innovative Information Technology, Networked Systems & Cyber Tools, including: CG mobility, software prototyping, cloud computing, software defined networks, mixed reality, telecommunications, space based systems, and cyber security systems.
- Evaluate efficient information storage, management and knowledge tech.
- Support ITNET Strategic Project Portfolio Alignment and CG DCO/DCMS Research Priorities; Maintain Branch infrastructure to support RDC Portfolio objectives.
- Provide expert input to CG stakeholders regarding ITNET technologies.
- Establish robust relationships with CG sponsors/stakeholders and external U.S. DoD labs, U.S. Department of Homeland Security (DHS) Science and Technology Directorate (S&T), and other government agency/academic partners.
- Provide service academy, Historically Black College or University, and Minority Serving Institution students internship opportunities.
- Build lean application evaluation platform to provide effective recommendations to Program Managers and Product Line Managers.

- Develop a “Sector of the Future” lab setup to assess how technology can transform Sector-level operation decision making and communications.
- Command, Control, Communications, Computers, Cyber, Intelligence Service Center (C5ISC) Cutter Lab mockup, computer forensics/cyber test bed.
- Support Cutter Connectivity lab development working in conjunction with C5I Branch as well as collaborate with other DoD Lab projects.
- Participate with C5I organizations such as the Radio Technical Commission for Maritime Services (RTCM) and Institute Navigation.

**Incorporating Sensor Performance in SAROPS**

**Mission Need:** Time and cost effective methodology to incorporate sensor capabilities in SAROPS.

**Objectives**
- Determine sensitivity of the Search and Rescue Optimal Planning System (SAROPS) search metrics to inputs.
- Identify a resource-effective approach to develop the sensor-specific data required for use in SAROPS.
- Create a prototype of this new approach for developing the sensor-specific data.

**Notes**
- Leverages RDC’s previous work with developing SAROPS sensor inputs.

Applications of Robotic Process Automation

Mission Need: Repeatable process automation to enable operational and mission support efficiencies.

- Provide an understanding of the current state of Robotic Process Automation (RPA).
- Identify challenges to acquiring and implementing RPA solutions.
- Investigate specific use-cases of RPA.
- Identify requirements for sustainment of RPA after development.

Notes

- Leverage existing RDC Project 7401 “Machine Learning Platforms to Improve Coast Guard Tools.”
- Coordinate with the Joint Artificial Intelligence Center, CG Finance Center (FINCEN), and the Department of Homeland Security RPA Working Group.
- Potential partnership with Naval Postgraduate School.

Sponsor: CG-67

Condition-Based Maintenance (CBM) for Coast Guard Asset Product Lines

**Mission Need:** Targeted CBM for higher asset availability and reduced life cycle costs.

- Implement condition-based and predictive maintenance activities within the surface and aviation communities by researching and documenting significant opportunities for using leading indicators and readily available system information, including the following system characteristics: interfaces, data structure, data analysis, and data display that support a data driven system.
- Develop demonstration case studies using predictive maintenance with U.S. Coast Guard (CG) data to provide recommendations for systems and steps required to accommodate desired functional characteristics of a data driven system.

**Objectives**

**Notes**

- Partner with the CG Surface Forces Logistics Center (SFLC) and Aviation Logistics Center (ALC) to make recommendations.

**Sponsor:** CG-45, CG-41

**Stakeholder(s):** SFLC, ALC

**RDC Research Lead:** Ms. Christine Hansen

**CG-926 Domain Lead:** Dr. David Wiesenhahn

Mission Need: Improve long-term polar SAR and Mass Rescue Operations contingency planning.

Objectives
- Use data analysis, and modeling/simulation approaches to investigate the IMO Polar Code survival time; provide recommendations for updates to CG-SAR.
- Estimate expected polar rescue time using past remote rescue operations and changes in polar traffic density.
- Produce a robust data set through mining data sources for remote/polar transits and remote rescue operations for use in mathematical modeling.
- Use the findings to conduct an analysis to evaluate and inform international standards and contingency planning.

Notes
- Conduct a consolidated data analysis of Automatic Identification System (AIS) vessel track information as well as past remote rescue operations.
- Explore partnership opportunities with international organizations including Canadian Search and Rescue (SAR), Finnish Border Guard, IMO, University of Washington Polar Science Center, University of the Arctic Consortium, U.S. Geological Survey historic arctic rescue data, Arctic Council, RAND Corporation, Denmark, & Greenland.
- Leverage past and ongoing RDC efforts relating to polar and SAR operations.

Sponsor: CG-SAR
Stakeholder(s): D17, Center for Arctic Study and Policy, CG-ENG, AREAs
RDC Research Lead: Ms. Christine Mahoney
CG-926 Domain Lead: Dr. David Wiesenhahn

Anticipated Outcome/Transition: Recommendations for Standards/Regulations/Policy Transition

Cognitive Training for High-Risk Operators

**Mission Need:** Improve cognitive skills and decision-making in high-risk operations.

- Research objective measurements that demonstrate the influence of selected cognitive training program(s) on training environment evaluations.
- Develop a research framework for collecting empirical evidence of performance improvement in the training environment.
- Develop understanding of impact cognitive training programs have on trainees’ performance.
- Develop recommendations for one or more cognitive training programs for evaluation in an operational setting.

- Potential collaboration with CG Auxiliary, Naval Health Research Center in San Diego, Naval Medical Research Unit Dayton, and Naval Special Warfare Command.

**Objectives**

Persistent Simulation for the CG Workforce

**Mission Need:** Simulation tool to forecast strategic workforce needs and inform HR policy decisions.

### Objectives
- Provide CG-126 (Office of Strategic Workforce Planning and Human Resource Analytics) an efficient approach to make quantitative analysis-based recommendations about Human Resource (HR) policy decisions at a strategic level.
- Explore and/or build a modeling framework and predictive simulation tool that will help analysts examine HR data in a more efficient manner to forecast workforce demands at various points in the future (e.g., 2, 5, 10, or etc. years).
- Develop a framework for a Verification, Validation, and Accreditation approach to address policy/strategy workforce questions for decision-makers and programs.

### Notes
- Conduct research to support the Ready Workforce 2030 strategy and Commandant’s Intent.
- Agent based simulation modeling is a well-known approach in literature, and promising for this instance.
- Explore collaboration with other partner and military agencies who have addressed this problem space.
- Explore collaboration with the U.S. Department of Homeland Security Science and Technology Directorate Office of University Programs.
- Collaborate with CG Academy faculty on model development.

### Sponsor: CG-126

October 2022
# Artificial Intelligence/Machine Learning (AI/ML) for Computer Imagery and Sensor Data

## Mission Need:
Develop, deploy, and sustain artificial intelligence in support of CG missions.

## Objectives
To maintain efficiency and improve mission performance, the CG must capitalize on new sensor data sources and technologies such as artificial intelligence and machine learning. To realize the benefits, the CG must:

- Understand the algorithms, software, platform, and service infrastructures available from Department of Homeland Security (DHS), Department of Defense (DoD), National Geospatial-Intelligence Agency (NGA), and other Federal partners for Artificial Intelligence development, deployment, and sustainment.
- Understand the hardware, network, edge, and cloud computing infrastructures in the CG and from Federal partners for AI deployment and operations to support the “edge to watchstander pipeline.”
- Examine how imagery and other sensor data can be used in real time to support operators and in post-analysis to support analysts.

## Notes
- Track and report on federal partner and commercial AI models and methods in sensor fusion, maritime domain awareness, and pattern of life.
- Track and report on what other DoD, DHS, NGA partners are using and building for their physical and networking AI infrastructure.
- Follow Small Business Innovation Research-Other Agency Technology Solutions, Naval Postgraduate School, U.S. Navy, Joint Artificial Intelligence Center, Air Force Institute of Technology, CT National Guard, National Security Innovation Network, and Intelligence Coordination Center.

**Indicates RDC Product ★**
Mission Need: Maintain competency/knowledge; provide rapid response; and external liaison.

Objectives:

- Maintain competency and technical knowledge in understanding present and future Operations Research (OR)/Data Analytics (DA) tools and techniques including: modeling & simulation, data analytics, Artificial Intelligence (AI) & Machine Learning (ML), process automation, risk analysis, and human factors.
- Maintain Branch infrastructure to support RDC portfolio objectives.
- Support MSA Strategic Project Portfolio Alignment and CG DCO/DCMS Research Priorities.
- Provide expert input to CG stakeholders regarding use and application of AI/ML and OR/DA technologies and techniques.
- Foster continued relationships with CG sponsors/stakeholders and external Department of Defense labs, Department of Homeland Security (DHS) Science and Technology Directorate (S&T), and other government agency/academic partners.
- Provide service academy, Historically Black Colleges and Universities, and Minority Serving Institutions students internship opportunities.

Notes:

- Represent CG on Chief Digital and Artificial Intelligence Office (CDAO) Service Lab AI Research and Development Subcommittee; CDAO Predictive Maintenance Subcommittee; and Tri-Service Lab Commander’s Sync Data Analytics Working Group.
- Member of CG-7 Unmanned Systems Integrated Product Team (AI Subcommittee); CG OR/DA Working Group, CG Data Readiness Task Force Advisory Group, CG Modeling & Simulation Advisory Council, and RDC Institutional Review Board.

Sponsor: CG-926

- Natural Language Processing Analysis of Unstructured Search and Rescue Narratives (CGA Partnership): TBD

Project Completion: Ongoing
Enhanced Rotary Wing Night Vision Goggle (NVG) Searches

Mission Need: Improved NVG/augmented lighting to support SAR and LE missions.

Objectives

- Deliver decision support information regarding Tactics, Techniques, and Procedures (TTP) opportunities to enhance rotary wing NVG searches for both Search and Rescue (SAR) and Law Enforcement (LE) missions. Research focus will primarily be on augmented lighting sources and their ability to improve existing NVG technologies.
- Investigate mitigation strategies for backlight and ambient light effects for coxswains using NVGs.

Notes

- Explore collaboration opportunities with Air Force Research Laboratory, Naval Research Laboratory, Army Research Laboratory (Adelphi Laboratory Center) and Army Combat Capabilities Development Command CSISR Center Night Vision and Electronic Sensors Directorate.

## Mission Need:
Improved detection, tracking, classification, and deterrence of underwater threats.

### Objectives
- Deliver decision support information regarding improved C-UUV capabilities for detection, tracking, classification, and deterring underwater threats by performing and documenting results of Limited User Evaluation for C-UUV capabilities.

### Notes
- Building on past RDC anti-swimmer work.

### Sponsor:
CG-721

### Stakeholder(s):
CG-45, CG-731, CG-761, AREA-3, CGCYBER

### RDC Research Lead:
C-UUV Research Team

### CG-926 Domain Lead:
C-UUV Research Team

### Anticipated Outcome/Transition:
Recommendations on Tech Availability & Applicability

Please e-mail RDC-Info@uscg.mil for information concerning the Milestones and Deliverable Schedule.
**Mission Need:** Provide support to relevant research efforts in the Polar Regions.

- Provide support to projects which develop capability improvements in the execution of U.S. Coast Guard (CG) missions in Polar Regions.
- Cultivate joint efforts and interagency cooperation between government sectors and civilian entities.
- Evaluate emerging technologies to enhance CG operations in Polar Regions.

**Objectives**

**Sponsor:** CG-751

**Stakeholder(s):** CG-5PW, CG-761, PAC-3, LANT-5, D17

**RDC Research Lead:** Ms. Shalane Regan

**CG-926 Domain Lead:** Ms. Karin Messenger

**Anticipated Outcome/Transition:** Recommendations on Tech Availability & Applicability

**Project Timeline / Key Milestones**

- **Project Start:** 1 Oct 20
- **Partners/Technologies/Test Plans Identified (FY21)**: 30 Jul 21
- **FY21 Research Efforts/Partners Solicited**: 30 Jul 21
- **Tests/Demonstrations Complete (FY21)**: 20 Nov 21
- **Partners/Technologies/Test Plans Identified (FY22)**: Apr 22
- **FY22 Research Efforts/Partners Solicited**: May 22
- **Polar Regions Technology Evaluation FY21 (Application Note)**: 30 Jun 22
- **Tests/Demonstrations Complete (FY22)**: Oct 22
- **Polar Technology Evaluation FY22 (Application Note)**: Mar 23

**Project Completion:** Mar 23
**Mission Need:** Evaluate newer, less hazardous water purification systems.

- Deliver decision support information regarding effective utilization of bromine-free water purification systems for National Security Cutters, Fast Response Cutters (FRC), and Operational Patrol Cutters (OPC).

**Notes**
- Legislative requirement.
- Collaborating with the U.S. Army Engineer Research and Development Center Construction Engineering Research Laboratory; Naval Surface Warfare Center – Carderock Division, Corona Division, Crane Division, Philadelphia Division; and U.S. Naval Research Laboratory.

**Objectives**

| Sponsor: | Surface Force Logistics Center (SFLC) |
| Stakeholder(s): | CG-45, SFLC-LRE |

November 2022 47
**Objectives**

- **Mission Need:** Mitigate stability-related hazards to liftboats/operators.

- **Notes:**
  - Conduct “Non-Ship Shape Vessel Stability Requirements” study.
    - Investigate current CFR, ABS, and CG Liftboat Stability Standards and Regulations.
    - Analyze hull design and construction variations through different stability calculation methods.
    - Investigate potential disparities in wind heeling moments as a results of unrealistic shape factors.
    - Develop mitigation strategies tailored to Liftboat classifications.
  - Support classification and regulation revision process as appropriate.

- **Leverage Sponsor activities to conduct “Non-Ship Shape Vessel Stability Requirements” study.**

- **Leverage current American Bureau of Shipping guidance for building and classing Liftboats.**

- **Leverage the National Academies of Sciences, Engineering, and Medicine resources.**

- **Leverage State Maritime Academies.**

  - Feb 24 ★

**Project Completion:** Feb 24

**Anticipated Outcome/Transition:** Recommendations for Standards/Regulations/Policy
Cutter-Based Unmanned Systems (UxS) Integration Analysis

**Mission Need:** Integrated UxS across cutter fleet to augment operational capabilities.

### Objectives

- Determine the capacity current and future cutter classes possess to integrate, deploy, and support UxS.
- Characterize general UxS classes for space, weight, power, and personnel requirements.
- Analyze possible cutter/UxS combinations and identify UxS integration considerations tailored for CG assets.
- Identify design efficiencies related to human, mission, system and infrastructure integration.
- Construct notional future scenarios that represent the integration of future design requirements.
- Inform future capability and operational documents.

### Notes

- UxS integration considers maritime air, surface, and subsurface systems of all scales that can be based onboard a cutter.
- Leverages RDC Project 7820 “Maritime Unmanned System Technology” to highlight capabilities.
- Addresses imperatives highlighted by National Academies of Science UxS study.
- Leverage research by the Naval Post Graduate School, Navy Surface Warfare Centers, and Naval Research Laboratory.

Engine Combustion Enhancement Technology

Mission Need: Enhance combustion efficiency to improve engine performance and reduce pollution.

Objectives
- Query the U.S. Navy (USN) and other organizations to leverage possible solutions for enhancing combustion efficiency in diesel fuel for energy/propulsion.
- Identify quantitative parameters for testing the efficacy of using new fuel additives, and combustion enhancement products.
- Perform field evaluations of available commercial technology with the goal of countering incomplete combustion to improve fuel efficiency, reducing pollution, and reduce maintenance costs.
- Assess cost and benefits for technology based on test results.
- Report cost and benefits for technology based on test results.
- Evaluate technologies on engines representative of U.S. Coast Guard (CG) assets.

Notes
- Partner with the USN Expeditionary Combat Command, Navy Seabees, U.S. Army Combat Capabilities Development Command, Cal Maritime, Federal Laboratory Consortium, DOE National Renewable Energy Laboratory, and NATO Centre for Maritime Research and Experimentation - La Spezia.
- Leverage CG Academy research on biocide additives.
- Technologies could also be applicable to gasoline and aviation fuel.
- Possible use of Cooperative Research & Development Agreements (CRADA).
- This project ties into Project Evergreen climate change event.

Sponsor: CG-46  Stakeholder(s): CG-45, Surface Forces Logistics Center, CGA, CG-47D

Remote Diagnostic and Monitoring Systems for Technical Support Engineering

Mission Need: Improve shore-side access to cutter engineering data.

- Assess Supervisory Control and Data Acquisition (SCADA) implementation across CG cutter classes.
- Investigate Military/Other Government Agency (OGA)/Commercial vessel SCADA data transfer technology maturity & implementation framework.
- Develop and evaluate prototype data transfer system for National Security Cutter, Fast Response Cutter or Keeper Class Tender.
- Deliver decision support information and technology transition report/roadmap.

Notes
- Leverage Naval Sea Systems Command and Military Sealift Command for technology framework application.
- Partner with Surface Forces Logistics Center (SFLC) and RDC Project 9204 “Condition Based Maintenance for Coast Guard Asset Product Lines” Project Manager for solution integration with CG systems (e.g., CG-LIMS, ALMIS, etc.).
- Potential collaboration with the Naval Postgraduate School and Johns Hopkins Applied Physics Laboratory.

**Mission Need:** Increase unity, share knowledge, build innovation culture, and transition technology.

### Objectives

- Maintain U.S. Coast Guard (CG) Research and Development Center (RDC) competency and technical knowledge in understanding present and future technology to support CG mission execution.
- Maintain a collaborative relationship between the CG’s Research, Development, Test and Evaluation Program Office and the U.S. Department of Homeland Security (DHS) Science & Technology Directorate (S&T) along with Department of Defense, Department of Energy, and the Federal Laboratory Consortium to share and advance technologies that will be mutually beneficial to both parties.
- Provide Tactics, Techniques and Procedures for use in development of requirements for new technology evaluations and transitions.
- Maintain Branch infrastructure to support RDC portfolio objectives.
- Support Strategic Project Portfolio and CG DCO/DCMS Research Priorities.
- Provide expert input to CG stakeholders regarding advanced technologies.
- Provide service academy, Historically Black College or University, and Minority Serving Institution students internship opportunities.

### Notes

- Align with DHS S&T Integrated Project Team gaps and CG Idea Submission Review input.
- Support RDC tasks as requested (WCC Sonar, ISR Buoy Prototype for MDA Man Portable Doppler Radar, SAR Hawk).
