

Dr. Kelly Neville

Dr. Kelly Neville earned her M.A. and Ph.D. in experimental psychology from Rice University. She began her career in the Air Force Research Laboratory; has since worked in academia, industry, and yet again the Department of Defense; and is now with MITRE's Modeling, Simulation, Experimentation, and Analysis Innovation Center. Her work focuses on expertise acquisition in complex cognitive work, system resilience, human-systems integration, and the transition of new capability into high-consequence work systems. Dr. Neville has authored over 100 publications, served as President of her local International Council on Systems Engineering (INCOSE) chapter, and serves on the Board of the Central Florida Women in Defense (WID) chapter.
